4.0 Release Installation Methods

These four releases and the software patch can and should be installed by the customer.

First make sure that Software Upgrade is enabled on the device. To enable Software Upgrade:

1. In the Embedded Web Server, click **Properties > General Setup > Software Upgrade**.
2. To allow users to upgrade software, click **Allow Upgrade**.

Note: If Restrict Upgrade appears, upgrades are allowed already.

The installation instructions to install the Common Criteria certified versions for the AltaLink® B8145/B8155/B8170 with HDD or SSD and AltaLink® C8130/C8135/C8145/C8155/C8170 with HDD or SSD are contained in the zip file link for these devices listed on Page 1 of this bulletin.

For all software upgrade methods, a software upgrade status report prints after the upgrade is complete. You can check the status of the upgrade on the Software Upgrade page in the Embedded Web Server. Compare the information noted in the Current Software area on the Software Upgrade page with the printed status report.

To view the current software version in the Embedded Web Server:

1. In the Embedded Web Server, click **Properties > General Setup > Software Upgrade**.
2. For Current Software, note the date, time, and version of the last successful software upgrade.
3. For Last Upgrade Attempt, note the date, time, version, and status of the last upgrade attempt.

To verify the success of the upgrade, compare this information with the printed software upgrade status report. The software release is installed when the system software version on the printed Configuration Report shows the system software version number indicated in the applicable table on Pages 2 and 3.
